Good Morning Mam/Sir,

I'm Mayank Yadav, presenting on behalf of my team "Saarthi".

Let me start with a real problem we're facing right now. It's placement season at our college, and we're all feeling a bit lost. Every day, we get emails about different companies coming to campus. Yes, It's exciting, but also very confusing. As we don't know much about these companies or how to get ready for their interviews.

We need help, but we're not sure who to ask. We know our seniors could give us great tips, but we hardly know any of them. It feels awkward to just reach out.

Some of us try sending messages on LinkedIn, but it feels strange. "Hey, you don't know me, but can you help?" Sometimes they reply, sometimes they don't.

This communication gap isn't just affecting our placements. We're missing out on mentorship, networking opportunities, and feeling connected to our college community even after we graduate.

This is why we've chosen to work on the problem statement: "Implementation of Alumni Association Platform for the university/institute". We believe that by solving this, we can make a real difference in how students and alumni connect and help each other.

Slide Change

Now, let's move to our proposed solution: "Saarthi".

We've named our platform "SAARTHI", and there's a good reason for it. In Hindi, "Saarthi" means guide or charioteer. Just like a Saarthi guides a chariot, our alumni will guide us through our college years and beyond.

After analyzing the problem statement, we've identified these core features which are the basic requirement:

1. Alumni Registration and Directory
2. Alumni Networking Hub
3. Job Portal
4. Donation Portal
5. Events and Reunions Management
6. Success Story Tracking

Enhanced Features

But we wanted to do more than just the basics. To make our platform really special and useful in today's digital world, we've added some cool features using new technology:

1. AI-Driven Networking Hub - it's like a smarter version of LinkedIn!
2. Blockchain-based Secure Donation Portal - to keep every donation safe and clear
3. AI Career Advisor - like having a job expert in your phone
4. AI Driven Job Matching and Employment Networking - to help you find the right job faster
5. CRD Space - Collaborative Research and Development - for big thinkers to work together

System Architecture

Now, you might be wondering, "Mayank, this all sounds great, but how does it actually work?" Great question! Let me show you our system architecture.

[At this point, you would transition to your system architecture slide]

As you can see here...

[Explain your system architecture in a friendly, easy-to-understand way]

Demo

I could talk about Saarthi all day, but I think it's time we show you how it works. I'll now hand over to my teammate Divya, who'll give you a quick demo of our prototype.

Divya, it's your turn!

Thank you for listening.
